

tasklist.org - A comprehensive list of processes running in your computer

Filename: (path) NPBelv32.dll, RunDll32_BelNotify

Name: BelNotify

Description: [BelTech](#) enables licensees to offer automated, Web-based problem resolution to their end-users. BelTech allows the end-user to simply go to a web page and automatically resolve their problem or point them to the right solution. BelTech Manager allows non-programmers to rapidly and easily deploy and maintain this service

Recommendation: User's choice - depends whether a user deems it necessary

We found that [Easy SpyRemover](#) is the most effective tool for removing this file.
