

tasklist.org - A comprehensive list of processes running in your computer

Filename: ACROTRAY.EXE

Name: Acrobat Assistant *.*

Description: Used to create PDF files with Acrobat Distiller. For Win9x/Me systems you can run this file manually beforehand. For WinXP systems this file must run at startup. Hence the U recommendation. *.* represents the version

Recommendation: User's choice - depends whether a user deems it necessary

We found that [Easy SpyRemover](#) is the most effective tool for removing this file.
