

tasklist.org - A comprehensive list of processes running in your computer

Filename: Adobe Gamma Loader.exe

Name: Adobe Gamma Loader

Description: Adjusts monitor colours across all programs, including Photoshop. It is needed by some graphics professionals who want their monitor calibrated. Most home users will not need it. In my case I can verify this as Photoshop loads fine

Recommendation: User's choice - depends whether a user deems it necessary

We found that [Easy SpyRemover](#) is the most effective tool for removing this file.
