

[tasklist.org](http://tasklist.org) - A comprehensive list of processes running in your computer

Filename: Fbmount.exe

Name: Mount Safe & Sound

Description: From McAfee VirusScan version 5.x. Creates back-up sets of critical files in a separate area of a hard drive. If you make regular back-ups it's not needed and can be painful during system start

Recommendation: User's choice - depends whether a user deems it necessary

We found that [Easy SpyRemover](#) is the most effective tool for removing this file.
