

tasklist.org - A comprehensive list of processes running in your computer

Filename: IMGICON.EXE

Name: ZipDisk Icons

Description: Displays Iomega icons in Explorer/My Computer, ejects Zip disks on shutdown and displays a special delete confirmation box when deleting files on an Iomega drive.

Available via Start -> Programs. If you disable it remember to eject disks first before powering the drive down - hence the U recommendation. Note - FreeCell may not run with ImgIcon running

Recommendation: User's choice - depends whether a user deems it necessary

We found that [Easy SpyRemover](#) is the most effective tool for removing this file.
