

tasklist.org - A comprehensive list of processes running in your computer

Filename: KEM.exe

Name: Logitech SetPoint

Description: Keyboard and mouse drivers and utilities for Logitech's latest products - supersedes iTouch and MouseWare on their older products. Required if you use special features such as multimedia keys

Recommendation: User's choice - depends whether a user deems it necessary

We found that [Easy SpyRemover](#) is the most effective tool for removing this file.
