

tasklist.org - A comprehensive list of processes running in your computer

Filename: MAD.EXE

Name: MAD.EXE

Description: MAD.exe is the MS Exchange 5.5 System Attendant and can also consume a large amount of resources - resolved by the latest Exchange 5.5 Service Pack. Also part of Exchange 2000 Server but does it have the same problems?. Apparently you need to leave this running but is it needed at start-up?

Recommendation: Normally leave to run at start-up

We found that [Easy SpyRemover](#) is the most effective tool for removing this file.
