

[tasklist.org](http://tasklist.org) - A comprehensive list of processes running in your computer

Filename: PartSeal.exe

Name: PartSeal

Description: System backup for Sony Vaio PCs. Adds a recovery mechanism for users over and above any System Restore features - allowing users to revert a drive back to the state it was when bought from the factory by hitting F10. The user obviously loses any data stored if not backed-up elsewhere

Recommendation: User's choice - depends whether a user deems it necessary

We found that [Easy SpyRemover](#) is the most effective tool for removing this file.
