

tasklist.org - A comprehensive list of processes running in your computer

Filename: Qctray.exe

Name: QCTRAY

Description: System Tray icon providing access to the IBM Access Connections wizard on ThinkPad laptops and also allows to change the network environment. Not the same as QCWLIcon, which is pertinent only to the Wireless LAN

Recommendation: User's choice - depends whether a user deems it necessary

We found that [Easy SpyRemover](#) is the most effective tool for removing this file.
