

[tasklist.org](http://tasklist.org) - A comprehensive list of processes running in your computer

Filename: QtZgAcer.EXE

Name: LManager

Description: Acer Launch Manager - on Acer laptops it allows users to configure shortcut keys and to set the operating state of the WLAN module and the (optional) Bluetooth radio

Recommendation: User's choice - depends whether a user deems it necessary

We found that [Easy SpyRemover](#) is the most effective tool for removing this file.
