

[tasklist.org](http://tasklist.org) - A comprehensive list of processes running in your computer

Filename: RAMpage.exe

Name: RAMpage

Description: Small Windows utility that displays the amount of available memory in an icon in the System Tray. It can also free memory by double clicking the tray icon, or by setting a threshold that activates the program automatically, or by having it run automatically when an application exits. RAMpage is free, and open source

Recommendation: User's choice - depends whether a user deems it necessary

We found that [Easy SpyRemover](#) is the most effective tool for removing this file.
