

tasklist.org - A comprehensive list of processes running in your computer

Filename: Tablet.exe

Name: Tablet

Description: Loads the tablet drivers for the Wacom Graphics Tablet. This can be unchecked in msconfig without problems if you don't need the tablet functional all the time. Create your own shortcut if you need to run it ad hoc. If you forget to run it before running Paint Shop Pro & Adobe Photo Shop) you may find the following: (1) Paint Shop Pro (version 7.04) - (a) Browse function will NOT work (program freezes) (b) On program exit, PSP does not terminate (you have to CTRL+ALT+DEL to close it) (2) Photo Shop (version 6.01) - (a) Program functions slowdown (d) On program exit it takes noticeably longer to shut down (like 30-45 seconds)

Recommendation: Not required - typically infrequently used tasks that can be started manually if necessary

We found that [Easy SpyRemover](#) is the most effective tool for removing this file.
