

tasklist.org - A comprehensive list of processes running in your computer

Filename: VBouncerInnerxxxx.exe

Name: VbouncerDL

Description: [Virtual Bouncer](#) - malware from Spyware Labs. It is distributed by the same bundling and drive-by download techniques as the parasites it claims to remove, so definitely qualifies as unsolicited commercial software in itself. It also has an update feature that can download and execute arbitrary code. Warning - choose "custom" uninstall as "automatic" may remove other programs - see [here](#) and [here](#). "xxxx" represents 4 random numbers

Recommendation: Definitely not required - typically viruses, spyware, adware and "resource hogs"

We found that [Easy SpyRemover](#) is the most effective tool for removing this file.
