

tasklist.org - A comprehensive list of processes running in your computer

Filename: W3dbsmgr.exe

Name: Pervasive.SQL Workgroup Engine

Description: Database Service Manager for Pervasive SQL 2000 Workgroup edition. Required if you use Pervasive SQL but it's recommended you start it manually before using it as it has a tendency to crash/freeze if loaded with other applications at startup

Recommendation: User's choice - depends whether a user deems it necessary
