

[tasklist.org](http://tasklist.org) - A comprehensive list of processes running in your computer

Filename: WF2k.exe

Name: WinFoxV2

Description: System Tray application that starts up the Winfox utility for a Leadtek Winfast graphics card to restore settings. Can be started manually from Start -> Settings -> Control Panel Display. Only needed if you wish to run things like the hardware monitor or overclock your card

Recommendation: User's choice - depends whether a user deems it necessary

We found that [Easy SpyRemover](#) is the most effective tool for removing this file.
