

tasklist.org - A comprehensive list of processes running in your computer

Filename: WINAMPa.exe

Name: WinampAgentorWinampa

Description: Loads the System Tray icon for the WinAmp media player. Can be used to maintain file associations so programs like QuickTime and RealPlayer don't take over as default player for various media types. Available via Start -> Programs

Recommendation: User's choice - depends whether a user deems it necessary

We found that [Easy SpyRemover](#) is the most effective tool for removing this file.
