

tasklist.org - A comprehensive list of processes running in your computer

Filename: YAHOOPOPS.EXE

Name: Launch YahooPOPs! at Windows startup

Description: [YahooPOPs](#) - enables free POP3/SMTP access to Yahoo! Mail through a service on localhost that emulates the web interface. Available via Start -> Programs

Recommendation: Not required - typically infrequently used tasks that can be started manually if necessary

We found that [Easy SpyRemover](#) is the most effective tool for removing this file.
