

[tasklist.org](http://tasklist.org) - A comprehensive list of processes running in your computer

Filename: ctfmon.exe

Name: ctfmon

Description: CTFMon is involved with the language/alternative input services in Office XP. CTFMON.exe will continue to put itself back into MSConfig when you run the Office XP apps as long as the Text Services and Speech applets in the Control Panel are enabled. Not required if you don't need these features. For more info on ctfmon see [here](#)

[Recommendation: User's choice - depends whether a user deems it necessary](#)

- [We found that Easy SpyRemover is the most effective tool for removing this file.](#)
