

tasklist.org - A comprehensive list of processes running in your computer

Filename: dcfssvc.exe

Name: DCfssvc

Description: Associated with digital cameras and can cause problems which disappear if disabled. If this program is unchecked in startup, your camera will not cause your computer to open a pop-up window when you connect it. Leave enabled if you can't load pictures from your camera/dock - Kodak's dock is an example

Recommendation: User's choice - depends whether a user deems it necessary

We found that [Easy SpyRemover](#) is the most effective tool for removing this file.
