

tasklist.org - A comprehensive list of processes running in your computer

Filename: hampanel.exe

Name: HaMFrontPanel

Description: Displays a panel simulating modem lights for the Intel HaM internal modem. The lights are useful as a reminder to disconnect from the net if you are likely to forget, but otherwise pointless

Recommendation: User's choice - depends whether a user deems it necessary

We found that [Easy SpyRemover](#) is the most effective tool for removing this file.
