

[tasklist.org](http://tasklist.org) - A comprehensive list of processes running in your computer

Filename: hellmsn.exe

Virus Name: Worm/Mytob.AQ

Type: Worm

Risk: Medium

Description: This is now the most common type of virus. It spreads as an attachment to an e-mail sent from the infected computer. It is also able to spread by other methods - copying itself to shared network disks in local network, sending via IRC or as a file with some alluring name within a folder on a peer-to-peer file sharing system.

C:\hellmsn.exe

Recommendation: Definitely not required - typically viruses, spyware, adware and "resource hogs"

We found that [Easy SpyRemover](#) is the most effective tool for removing this file.
