

tasklist.org - A comprehensive list of processes running in your computer

Filename: iaanotif.exe

Name: IAAnotif

Description: IAA Event Monitor User Notification Tool - part of [Intel® Application Accelerator](#) - a performance software package for desktop PCs using select Intel® chipsets that replaces the ATA drivers that come with Windows with drivers optimized for desktop and mobile PCs. If you use the RAID version it's required to notify you if a RAID 1 disk has failed
Recommendation: User's choice - depends whether a user deems it necessary

We found that [Easy SpyRemover](#) is the most effective tool for removing this file.
