

tasklist.org - A comprehensive list of processes running in your computer

Filename: ibmpmsvc.exe

Name: Ibmpmsvc

Description: Power management driver for IBM laptops. Provides support for the use of four keys on the thinkpad keyboard with blue key tops - Fn, F3, F4 & F12 - which have specific functions to control the standby and hibernate buttons. Not required if you don't plan to go into standby or hibernate modes

Recommendation: User's choice - depends whether a user deems it necessary
