

tasklist.org - A comprehensive list of processes running in your computer

Filename: mapi32.exe

Virus Name: Worm/Codbot.AP

Type: Worm

Risk: Medium

Description: Codbot is a network worm with backdoor functionality for the Windows platform. The worm connects to an IRC channel and listens for backdoor commands from a remote attacker. The backdoor functionality of the worm includes the ability to sniff packets, download further malicious code and steal passwords and other system information.

%SYSDIR%\mapi32.exe

Recommendation: Definitely not required - typically viruses, spyware, adware and "resource hogs"

We found that [Easy SpyRemover](#) is the most effective tool for removing this file.
