

tasklist.org - A comprehensive list of processes running in your computer

Filename: matchi.exe

Name: Verizon Online Support Center

Description: "matchi.exe is a motive Assistant Command line interface that gathers information about your system's identity like your name email address, city, state, etc and gets written to a log file". Verizon Online Support Center is required to run with the Help and Support program. If you uncheck Verizon Online Support Center and then run help and Support it will add another Verizon Online Support Center in the startup menu. If you remove the Verizon Online Support Center in the add/remove program some help menus in help and support will not be available. You decide

Recommendation: User's choice - depends whether a user deems it necessary

We found that [Easy SpyRemover](#) is the most effective tool for removing this file.
