

tasklist.org - A comprehensive list of processes running in your computer

Filename: mstask.exe

Name: SchedulingAgent

Description: MS Scheduling Agent displayed as a box with a stopwatch in the System Tray that is only needed if you have regular scheduled disk defragmenting, ScanDisk, etc. Required if you have regularly scheduled events such as weekly virus scans

Recommendation: User's choice - depends whether a user deems it necessary

We found that [Easy SpyRemover](#) is the most effective tool for removing this file.
