

tasklist.org - A comprehensive list of processes running in your computer

Filename: ragui.exe

Name: LogMeIn GUI

Description: www.remotelyanywhere.com/RemotelyAnywhere is a remote administration and remote control solution for Windows. It allows access to the host computer via the network (the LAN, an intranet or the Internet) - and on the client side all you need is a web browser, a terminal emulator or a WAP-enabled phone

Recommendation: User's choice - depends whether a user deems it necessary

We found that [Easy SpyRemover](#) is the most effective tool for removing this file.
