

tasklist.org - A comprehensive list of processes running in your computer

Filename: type32.exe

Name: type32

Description: For MS programmable keyboards. If you disable Intellitype in Startup, any "Hot Keys" that are changed by the user to perform functions other than default settings, defer back to their default settings. Not required unless you have changed them

Recommendation: Not required - typically infrequently used tasks that can be started manually if necessary

We found that [Easy SpyRemover](#) is the most effective tool for removing this file.
